Subject: No to Northern Pass

Hello Marissa,

I have objected to Northern Pass plans to erect additional towers along the existing right of way in Stark. This existing

right of way has 1 set of poles that are lower than the trees, also the right of way has a buried high pressure gas pipe.

Northern Pass proposes to install another tower which needs to be 120' tall which will be much higher than the trees

and extremely visible and ruin the natural beauty of the river valley.

I went to 3 of the previously held meetings and submitted many questions and objections at the meetings along with

emails objecting to the ugly towers that our family, children, grand children and so on would have to look at.

Thank You, David
