I strongly oppose the Northern Pass project. Northern NH is a special place with a remote feel and Natural beauty. It is why people come to NH and choose recreation here. It is how people get away and find peace with nature. It makes no sense to cut and Scar that region with a private project that adds no value to our state. It will affect tourism and visitors to the state, because people will not choose to get away on their vacation and see Industry instead of nature.

Though I am from southern NH (Amherst), we spend a large amount of time in the North country. Our sons age 22 and 24 have been hiking since they were in kindergarten. We value that part of the state, and once industry and corporate profit are allowed to ruin the character of that place, we residents can never recreate that or get it back.

I confidently stand and support the 31 out of 32 communities along the projects proposed path who have voted to oppose this project. It makes no sense for NH.
