I live in senior housing at Sherburne Woods in Deerfield, NH. Just a few feet behind our six-building development are the current power lines. I have concern regarding additional lines to be added if Northern Pass gets permission to build. What about persons living here who may have a pacemaker? They may be in danger due to high voltage. I grew up in Deerfield and do not want to see the beauty that is Deerfield ruined by this horrible project. There are much better ways to receive the electric power each town needs - solar and wind power are being used more as people see that the alternatives are much better and safer than projects that ruin the environment. We are supposed to be taking care of the earth, not trying to see how fast we can overcome Mother Nature! NP is definitely NOT GOOD for NH. Please listen to all those (and there are thousands of us) who are asking for the reasonable alternative. DO NOT BUILD NORTHERN PASS. Save our state, our environment and our sanity. Remember, if his project is put in motion, we cannot go back. SAY NO NOW SO THERE WILL BE NO REGRETS LATER!! Please listen to your heart and do the RIGHT thing. Thank you for reading this. There are so many more like me that you won't hear from because they don't feel they can express themselves adequately. So many also, who do not realize what this be project will bring to NH until it is too late to turn back. Keep NH, the BEAUTIFUL!!!
