Subject: Please reject the Northern Pass project

To the Site Evaluation Committee,

Back in 2009 the Northern Pass project might have possibly helped lower electricity prices, but over the last several years we've seeing the growth and advantage of locally sited, clean, renewable solar and wind energy throughout our state. Northern Pass is not designed to serve the public interest and certainly not the citizens of New Hampshire or the Pessamit Innu First Nation. It is designed to maximize corporate profit. Please serve the best interest of your citizens and our state's future. Deny the Northern Pass transmission line through our northern forest - it is not in the public interest.

Respectfully,  
Abby Evankow
