Subject: no to northern pass

I am writing to voice my opposition to the Northern Pass project. I am against it because 1) the claim of the number of jobs it will create is misleading. They have taken a 3 year construction project and stated that 1 person working in one of these jobs for three years is 3 jobs FAULTY MATH!; 2) The 130 Ft tall towers (which according to the spokesperson will be placed every 800 Ft along the 192 mile path = 1267 towers across our state) will dwarf everything around them and become an eyesore thus hurting our tourist industry; 3) They have stated that burying the line would be too costly but their own spokesperson rested that it would only be 1.5-2 times the cost and they aren't taking into account the cost of maintaining the towers and access to them; 4) NH electric consumers will not benefit from this, the state is being used as a pass through to get the power to southern New England; 5) The Canadian power company is not going to okay or help pay for the cost of this project in NH.
