---

Good Evening,

I want to take the time to share my thoughts on the Northern Pass project. I feel strongly that Northern Pass is not right for NH. We should be looking forward to the future and be open to new technologies and sciences that promote the well being of our state, environment and people. Erecting massive towers and connecting them with wires will negatively impact NH. NH tourism relies on the natural beauty all around NH. It will negatively impact property values which in turn will negatively impact town budgets. This project will both reduce property values and increase tax rates. Northern Pass is said to provide taxes to towns but this money is not guaranteed. As an example, I believe PSNH often files for tax abatements in my town.

Please, lets be forward thinking. The leader of our country is not willing to think of the future generations so we as people need to be vigilant and demand better for our children.

Thank you,

Kim Therrien
