---

Good evening,

I am writing to oppose the northern pass project. I will make this brief.

1. This will make the north country less desirable to tourists. I already know west coast people, who climb the whites, and are looking into other places to go in new england. Even if you can't "see them", the idea that they are there will discourage people from coming.
2. Potentially devastating to our economy. Lack of tourism dollars as well as the disruption to small businesses in the burial path, would be a significant blow to our budget.
3. I personally don't want to drive to Bristol and have to go under them. The lines that are there are already an eyesore. Please don't make it worse.
4. Destroying our White Mountains is just environmentally irresponsible.
5. The question of who is really going to pay for it as well as the shady land sales also raise significant concern.

All in all, this is bad choice for NH.

Thank you,

Laura Romano
