I oppose the Northern Pass. The Northern Pass is not needed in the State of New Hampshire. NH already generates enough electricity for the State. The Northern Pass will generate electricity for Massachusetts and there already exists a power line in NH to provide electricity for Massachusetts so why would this be necessary? It is not good for the environment, it will not produce jobs, it will damage the beauty of the NH landscape. This damage will affect jobs and human health. I spend time hiking in New Hampshire and this would be a great sadness and disappointment to see this unsightly mess against the beauty that NH has to offer us. Please do not allow the Northern pass to become a reality..
