To The New Hampshire SEC,

I am writing to you with major concerns about the Northern Pass proposal. For those of us in NH, there is so much at stake.

The White Mountains are the crown jewel of NH. The character of our state and our tourist industry are dependent on the untainted vistas and beautiful views that we cherish. The environmental impacts of this project would be felt and seen for miles around. It is equally unacceptable to make the energy ratepayers pay to construct this monstrosity.

I have recently produced a video showing the highlights of the "Stop The Northern Pass Rally" held at the NH State House on April 23, 2017. Hundreds of people attended and the featured speakers detailed some of the reasons why this proposal is so bad for NH. I have attached a link if you would like to view it.

These beautiful places in our state have been handed down to us. As stewards of this land, it is our responsibility to protect and preserve it for future generations. Please do not allow Eversource and Hydro-Quebec to blight NH with this unnecessary Northern Pass proposal.

Thank you for your time and consideration.

Sincerely,
Craig Herlihy
Wilton, NH
