Subject: Re: Northern Pass

Dear Ms. Monroe ,

I feel the SEC should know several things. 1. The 135 ft. towers would be within a very short distance and within view of my house in Lancaster . If I should have to sell my home in a few years , I will have great difficulty doing so . It's retail price would plummet . The emissions from the electromagnetic fields from the towers OR underground , cause cancer and are destructive to human and animal life .

2. I've done the research . There is NO NEED for more electrical transmission in NH or even in all of New England . N.

Pass is strictly to enrich (by \$80,000 , 000 , 000 over 20 yrs.) the top echelon of HydroQuebec and Eversource .

3. Since when should a foreign country have the right to invade our country , destroy the economy of NNH (only tourism i s left) by a private company for their personal enrichment .

4. 95% of the people of NH do not want Northern Pass . That should end it right there , instead of dragging it on for 7 years . NO means NO , NOT EVER !

5. The SEC and the Dept. of Energy in Washington need to stand tall and strong and say NO Permits . No one wants this enrichment / greed project for the few that will be the only ones to gain from it .

6. Has the SEC seen what HydroQuebec has done in Canada to the environment ? How it's turned a blind eye toward their destruction / drowning of thousands of elk ? How it's destroyed land areas sacred to the First Nation people of Canada , ETC. ?

The whole process needs to be stopped
NOW ! No further discussion . H. Howard of Lancaster , NH
