### CommenterWords

I live in Deerfield, New Hampshire. I am opposed to the Northern Pass Transmission project not only because of the damage to our town and its property values; not only because of the line plowing through unwilling towns and open land throughout the state; not only because of money pouring out of our state; but because the gigantic line is the way of the past, a dinosaur on weak legs.

We should move in the direction of smaller, smarter grids and local generation; we should move away from gargantuan, capital-intensive, and ultimately vulnerable technologies.

Thank you for your consideration of so many factors.
