I am deeply opposed to Northern Pass and the decimation it will bring to Deerfield and to the environment. This is a project designed only to benefit the Utility companies and will not in any way reduce energy costs for Deerfield citizens. Rather, it will decrease Deerfield property values and lower the overall living quality in the community. The Northern Pass promise of jobs is not only flimsy but short-term, leaving in its wake a town that will never recover from the pillaging which the project will engender. I urge you STOP NORTHERN PASS and protect Deerfield and its citizens.
