### CommenterWords

I find that despite monthly/quarterly mailers sent by Northern Pass staff, I have not been adequately informed of the impact or any efforts to mitigate the environmental and fiscal impact to my family and property. Through my own research I have determined that 125' and 140' tower structures will be erected adjacent to my property. I measured the proposed placement of the 125' tower to be 100' away from my home. Not only do I believe this will have a very negative impact on my property value, but I believe this is unsafe for my family. I also do not believe Northern Pass has been transparent about their dealings because I researched the fact that the property these towers will be erected on, which is bordering my property, was purchased by Haynes Road LLC in April 2015 and has sat empty since. I choose not to speculate too much, but I should not have to speculate when my property and family's health is concerned.

After both my wife and I serving in the military for a cumulative 31 years, we used our VA benefits to settle in Deerfield so my wife was close to the clinic where she practices veterinary medicine. Now we worry that our property will be unsafe and undervalued. We also believe that Northern Pass will be more than just a blemish to Deerfield's skyline, it will devalue and ugly a quiet and historic rural community and create an unsafe environment to raise families.
