### CommenterWords

Dear Committee,

We oppose the construction of the Northern Pass transmission line as it stands with the current proposal. The burial in areas that they propose such as Plymouth, NH would disrupt many businesses unnecessarily. The towers would have a visual impact in regards to the natural beauty that we have, likely affecting tourism and home values.

There are options available from my understanding, such as burying the line in the median of Interstate 93, which would provide revenue for the State of New Hampshire. Other options should be implemented.

Sincerely,

Don & Linda Turnage  
Sanbornton
