I am against this project. I have watched many of these in my 67 years. Have yet to see one turn out as promised. They will hire mostly people from out of state like always. They will come and claim temporary residence. The jobs are temporary. N H. gets no benefit from this project. I feel once again they are being lied to. I also believe that if it were to come to pass ,it could follow the highway , which is forever being constructed already.
