Respected Members of the Evaluation Committee,
The Lakes Region of New Hampshire.

The name says it all. The beauty and tranquility of the region is a sanctuary from modern society. These God given "gifts" are the economic engine of this region as tourism is key to the area.

Newfound Lake with all its beauty has been visually desecrated by the appearance of windmills on the mountains on the northern end of the lake. No other lake in NH that I know of has this unique feature. Bristol does NOT need Northern Pass to come and add more ugliness to this pristine landscape.

I say: NO TO NORTHERN PASS

I respectfully urge you to say the same.

My town and NH will see no economic benefit whatsoever and the land will be scarred forever.

Stockholders can make money elsewhere.

Say "NO" to NORTHERN PASS!
