Commenter Words

I am opposed to you building transmission lines through our beautiful town. We hate the ugly towers and transmission lines. We know we will not save anything on electric bills and huge profits will go to already obscenely weathly cooperations and CEO's.

We already have to look at horrible wind turbines which do not provide our electricity. We pay increased property taxes for views. Let the people living in the urban areas south of us who will benefit from your lines ruin their skylines!
