This is a terrible project for NH. This will hurt the north country with industrial looking towers. We have little industry left and the hand we have been dealt is that we now need to rely on people coming here due to the beauty of the area. If that is taken away what do we have left?

The jobs that go along with this are temporary and the tax benefits will go away when Eversource or NP start the process to contest the taxes

"Since the appeals began several years ago, town officials in both Coos and Grafton counties have said the utilities are strategically challenging assessments in those towns that have small legal budgets and lack the money to fight them."
