While I support bringing Canadian hydropower to New England, I would hope that it could be accomplished without impacting the natural beauty of NH. This can be done, it seems to me, by using existing rights of way and by burying the lines wherever it would impact the natural beauty and wildlife of the state.

I find it inconceivable that somehow it has been decided that the best way to do this is to come through downtown Plymouth. What a disruption to the businesses and people of the town! I hope that clearer thinking will prevail.
