We need to move ahead with the Northern pass ASAP and stop the nonsense of electrical towers, which is necessary for progress.
In Franklin the revenue benefits are huge to fund our schools and revitalize our City which is badly needed. By have funds to create a first class school system is essential for revitalizing our City. Because of our schools we have had 4 young families with children on our street alone move out. Its time we stop complaining about electrical towers and move forward!

APPROVE NORTHERN PASS PROJECT!
