This "FORCED" project, of "EMINENT DOMAIN" is unwanted by N.H. residents, and is "UNCONSTITUTIONAL". It will only benefit those who will not be affected [Massachusetts, Rhode Island, and Connecticut,] by this monstrosity, of engineering, who will have lower rates while N.H. pays more. We do not want these "UGLY" towers, close to houses, where they can effect the health of those who live nearby. Our property value will be lowered, and the site of these towers is destructive to the environment. If you are TOO CHEAP to bury, these lines, do not proceed with this UNWANTED project. As with most FORCED projects they only benefit the WEALTHY. Therefore I will do by most to STOP this travesty of justice.
