We have been residents of Plymouth since 1979. We elected to settle in Plymouth due to its education opportunities for our sons but also for its natural beauty. The impact of the towers going through the Pemi valley would destroy forever that aspect of Plymouth. From an economic perspective, recruiting is enhanced by the attractiveness of the town. I, as the medical director, recruited for MId State Health Center professionals to come to Plymouth. The towers would be a major blow to that advantage.
