CommenterWords

I do not think the Northern Pass is for NH. There will not be any permanent jobs once it is completed, only tall towers that will deface our rural state. This is energy for the states south of us. We reap no benefits here in NH. Wake up New Hampshire!

Consider getting your energy source from your own neighborhood and don't ruin ours. I will never support the Northern Pass or Eversource who has made so many false promises that they really can't back with facts, just speculation.

Thank you for standing up. I stand with you in the fight against protecting our beautiful state of new Hampshire.

NO to Northern Pass.
