I cannot believe we haven't put this Northern Pass project to rest. Please tell Hydro Quebec and Eversource that we will not tolerate having our state exploited for their greedy purposes. Tourism is integral to our way of life here and the destruction of our natural resources will certainly be felt forever. Nobody wants to look at ugly transmission towers where there was once pristine natural beauty. Anyone who has done their homework knows that this project does NOTHING to help New Hampshire. I will be forever saddened and ashamed if our lawmakers allow us to be a doormat for big business. I beg you, stop this madness!
