This project would laughable if it weren't so serious. I see very little advantage for New Hampshire, and a great deal of harm will be done if it is allowed to be developed in it's present format. In the interest of compromise, I may be able to support the line if it is COMPLETELY buried, but anything short of that I am adamantly opposed to.

PLEASE do not support this ill conceived power line! Few residents of NH will benefit, and many will suffer!!
