Please vote against the Northern Pass. I am the third generation who has lived in this area. I returned to the area after 29 years of service with the US Public Health Service, CAPT (retired) and lived and worked all over the world in that capacity. I returned to this area when I retired because of the beauty of the land. Northern Pass would ruin the beauty and the very reason many of us choose to live in, return to and visit the region. I spent this morning fly fishing in area of the Connecticut river that would be adversely affected if the lines were to go through.

Best,

Monique
