I believe that when Mother Nature delivers a natural resource to you in the form of wind, sun or, in this case, water, we should harness its power and use it to create energy.

It is very frustrating to hear people object to the Northern Pass Project. These are the same people who complain about cell phone towers as they talk on their mobile device. Equipment is needed to deliver the goods and services we all enjoy - electricity is not excluded from the need of a delivery vehicle.

Thank you for all you are doing to bring clean energy to our region!
