Please vote NO on the Norther Pass going above ground through NH. This project will NOT help NH in any way.... quite the opposite. We do not need the energy, it's not for us anyway, but rather for the lower NE states that do not know what the phrase conserve energy means. . It will mar our landscape, hurt our property tax values and degrade our way of life. Hydro-Quebec and Eversource are only out to line their pockets at the expense of New Hampshire's citizens. These businesses in all honesty can NOT claim to provide public benefit to NH and her citizens. Therefore , in good conscience only one vote is possible..... NO.
Respectfully submitted, Betsy Thomas
