Hi,

I recently moved from the chaos of Connecticut to Northern NH, only to find out the land will be ruined for CT residents electrical needs.... WOW!

I am totally against this! CT needs to generate their own power, whether through wind, water or nuclear! They have regulations in place so their land and views aren't destroyed. If they need electricity, they can generate it! Their governor can remove restrictions that are in place so they can build whatever they need!

No to Northern Pass!

Thank you!
