To Whom it may Concern,

I oppose the Northern Pass project in all of its forms and feel that the huge money, research and time spent on this backwards project should be invested in alternative and sustainable power sources - for the state of NH. I do not feel that the state of NH should host the transmission lines in any form - above or under ground - disrupting our daily lives, the tourism industry that we all depend upon and the many facets of nature and our natural resources that would be disrupted and potentially destroyed.

Thank you,
Nina Garfield
