We live in the Mittersill Village in the Franconia Notch on the Cannon Mountain side of the Notch. The White Mountains are the biggest money maker for the State of New Hampshire in all four seasons. Tourism is the driver for our economy - the National and State parks, lakes with walking trails, the wildlife, skiing, biking, fishing - not to forget foliage season...

I have driven many times through Quebec to Montreal and on view for most of the drive are the Towers that follow the highway -- the differences are that their towers are planted on farmland - hardly view worthy. But our North Country mountain views would be ruined and allowing this eye sore into our mountains will kill tourism for the whole state.

Take the drive to Montreal some time, you'll have a different perspective. Say NO to NORTHERN PASS. PROTECT THE GRANITE STATE.

Respectfully.

Carole Charlin
