Subject: Northern Pass Proposal

Dear members of the SEC:

Please deny the Northern Pass proposal and make a stand for a wise, well-planned policy for appropriate siting of all new energy infrastructure in New Hampshire.

You are in a position to safeguard our state treasures -- our beautiful forested scenery. Be leaders who won't let careless corporate or economic interests destroy our state's natural beauty. Unlike other states where a lack of foresight has led to destruction of natural assets, New Hampshire still has so much to protect, and so much to lose.

We can do better than the Northern Pass proposal. Thank you.

Jon and Brenda Charpentier
