I implore you to do what is right for the residents of the state of Nh and deny the Norther Pass project. I believe it is morally wrong to allow corporate powers to take land from private landowners and have state residents struggle with construction, suffer through loss of tourism and deal with the potential health consequences of running high voltage power lines through the state. Any jobs gleaned from the construction will be extremely temporary and are not worth the consequences to the future wellbeing of the state. If the project is approved I feel very strongly that the project should have to follow the interstate 93 corridor and that they should have to pay a lease fee to the state.
