Subject: Kindly ask not to approve Northern Pass

Dear Pamela,

I am writing to you today to express my opposition to the Northern Pass Transmission as currently proposed. My family and I have a direct, vested interest to oppose this project. When NP was first being proposed in 2010 we were in the process of buying a second parcel of land for our retirement, we are not wealthy by any means and this investment took all of our financial resources and savings to pull it together and purchase it. We are now grieved to know the lines will be in very close proximity to our beloved land, the same land that we invested our life savings in. Our hope is to pass this beautiful piece of land onto our child when we die. Please, don't consider this to be about us I know our story is not unique and would be surprised if you have not already read a similar story.

Being lifelong NH residents, we have come to cherish the unique and beautiful landscapes that we consider our home and cannot imagine the thought of this state being scared with electrical towers that in some cases will exceed our tallest trees and forever ruin the most majestic views our state has to offer. Can we ever explain to our children how we exchanged our once beautiful state of NH for any price? I pray we will never need to do so.

Please, we beg that NH is not sold out to the promise of lower tax and electric rates. The beauty and pristine views of NH should not be compromised for any price. After the decision is made I hope we can all continue to proudly display our states motto of Live Free or Die.

I wish to offer my sincere thanks and gratitude for taking time to read my letter.

Sincerely,

Steve & Debbie Turgeon
