Subject: Northern Pass

Hello Ms. Monroe,

As a Concord taxpayer I feel I must give my viewpoint on Northern Pass. Personally I don't know why New Hampshire is allowing Canada to use our State to put cash in Canadian pockets and ruin our property and our views. Nature is a resource that most New Hampshire citizens appreciate, and looking at towering power lines will not improve the view. Also, it could have an impact on tourist dollars, as no one is interested in paying money to view power lines.

Also, I don't believe that anything should be taller than our State Capitol building. I also believe that these monstrosities cutting through highways and streets in the City of Concord could cause accidents as people will be distracted. After all, except for our mountains, there isn't much in our beloved State that is up to 600 feet tall!

These ugly, distracting things should be buried underground, out of sight of us and the tourists that flock here every weekend.

Thank you for allowing me to write to you, I'm probably saying the same things as everyone else, at least I hope there are more people standing up for New Hampshire!
