How many times do we, the affected citizens have to tell the politicians who are supposed to represent us that we don't want the Northern Pass project? We vote for them to speak for "US" and once in office, they turn on us. New Hampshire is a beautiful rural state that I so love and is why I live here. We've got something wonderful here and need to cherish it. Why allow outside or even inside interests mess it up? Has any of the committee or politicians traveled up I 89 into Canada to see that rats nest of towers up there? How can any sane person believe that those huge assemblies could be neatly tucked underground and leave the landscape nice and pretty? The scar would be visible from the moon.

By it's nature NH is not, and is not supposed to be an industrial city. The pass is of no benefit, but a detriment to our magnificent beautiful state. An awful price to pay.
