Do not allow this project to be built at all, above or below ground. Destroying NH visually is unacceptable and cannot be undone once the die is cast.

The USA in general, and NH specifically, must become energy independent. We have been talking about energy independence for decades and have done nothing. Within the USA we have identified viable energy sources, new and old, to power our needs for at least this century without environmental damage.

For example, we must bring new and larger gas pipelines into all the New England states to bring down electric costs and get business and industry to thrive here.

Please do not waste another dollar or another minute on Northern Pass.
