The Northern Pass Project as currently proposed is counterproductive for Northern NH. In a climate where there were great concerns about job loss in the north why would you ever seriously consider destroying the tourist economy here by allowing huge towers to mar the landscape and starting a "big dig" in Franconia which undoubtedly destroy the reputation for wonderful tourist experiences we've worked so hard to develop. It will take decades to rebuild this clientele.

All this for a mere 10% increase in energy supplies, maybe. If this is so important to southern NH and Mass and Conn and Quebec, why not insist on responsible burial all along the route and change the route to Interstate 93 where possible. The governor could even give Eversource a discount on the "rent" if he is so determined to allow this project.

So, please understand that I strongly oppose the Northern Pass project as it is proposed and hope when you consider all the evidence, you come to the same conclusion.

Thank you for your consideration and the time and energy you are putting in for our State.

Sincerely,
Angelo Costa
