I stand very opposed to the Northern Pass transmission line. The scenic and environmental damage will last for generations without any significant benefit for residents of NH. NH is known for its unspoiled beauty and wild landscape. It is what brings thousands of visitors annually and nourishes the hearts and souls of those of us who sacrifice higher wages in neighboring states just to live in unspoiled lands. Please do not take this from us. The beauty of NH is all that the state has left to offer and once gone it will be gone forever.
