Subject: 2015-06 Northern Pass-Eversource

Dear Ms. Monroe:

I am very concerned about the negative impact of the Northern Pass project on NH's economy. Neither our homeowners nor businesses will benefit from the power passing through our state, the proposed associated jobs are few and at best short-term, but the damage to our environment and tourist economy will be permanent. Also, if we want New Hampshire to be attractive to young people, we need to be embracing a green business approach and not the dirty energy 'business as usual' mentality that dates way back to the middle of the last century. We can do better! I urge you to consider the long term prospects of this very bad deal for New Hampshire and reject the Northern Pass proposal.

Sincerely,

Jacki Katzman
