Subject: Northern Pass

Dear Ms. Monroe:

I had intended to write you a proper letter, but fate intervened. First my car dies, then my printer ran dry. So I must resort to email.

As a Concord residen and citizen, I very much oppose the plan to use huge towers to carry this power through Concord. As a New Hampshire resident and citizen, I oppose such towers anywhere.

New Hampshire offers an excellent alternative - follow the I-93 corridor and bury the lines. Why take small but significant portions of land from many people by purchase or by eminent domain, when a sensible alternative exists?

Additionally, the hydro power intended for transmission is itself very destructive. Thousands of acres of boreal forest will be destroyed, the land and livelihood of at least one of Canada's first nations will vanish.

I encourage you and the other members to require Eversource and its partners to modify their plans to bring them into compliance with citizens' wishes - No towers! Bury the lines! Use the I-93 corridor!

If it matters - I am an Eversource stockholder.

Sincerely,

Eileen Keim

7 Bradley St, Concord NH 03301
