**Subject:** Bury the Northern Pass

Who is going to explain to our grandchildren why we allowed these ugly towers to be built in Concord and the rest of the state.

Most other states and countries are finding alternative ways to find energy.

Why are we being so ancient in our design?

With all the development of individual solar houses we are reducing the need for as much power in our state.

Get on the bandwagon and bury Northern Pass! It should be actually stopped.

Make a difference.

Nan Welch, 358 Mountain Road, East Concord
