Pamela: As the Senior Broker at Better Homes & Gardens the Masiello Group in Concord I strongly condemn that electrical towers as high as 165 feet may potentially be built through over 8 miles of our City of Concord. I have been an expert witness numerous times throughout my 47 years as a Realtor. Electrical towers, especially these very large ones clearly significantly reduce the market value of both residential and commercial real estate not to mention the visual pollution they create.

There is no question the vast majority of residents in Concord including myself as a resident of East Concord DO NOT WANT THESE TOWERS! I encourage other Realtors to reach out to you before the public meeting this Thursday and express their views in writing to yourself. Thank you for any consideration you may give this message.

Robert Wiita
