Please don't let Northern Pass come thru New Hampton or any other part of New Hampshire. Why...?

1. This beautiful state has so much to offer to both tourists and residents alike. Let's not ruin it with huge ugly power lines, towers, and related equipment.

2. Let's not degrade New Hampshire into looking like what much of Southern New England already looks like now.

3. This project provides no real long term benefits to New Hampshire at all.

4. Let's not let our beautiful state be pushed around by a group of money hungry corporations who could care less about the mess they will leave behind if this project should be allowed to go forward.

5. Southern New England's power problems should be solved by Southern New England...not by New Hampshire

6. Either bury the entire project under ground or forget about it all together!!!

7. There are no excuses for ever allowing Northern Pass into our beautiful state in the first place.
