---

Ms. Monroe,

Please count me as one that has contacted your office and is adamantly against the Northern Pass. Should the project move forward the lines need to be buried in Concord. There are too many negative aspects of the towers, and many of those that are in favor of the project and rejecting burring appear to have tunnel vision for personal advantages.

Thank you for your work on this very critical decision making process that will have considerable long term effects on our State.

Ed Welch
