Subject: Comments regarding Northern Pass project
Date: Thursday, July 20, 2017 3:59:43 PM

Dear Pamela,

Thank you for taking my comments below regarding the Northern Pass project.

“As a resident of Concord, NH I am opposed to the Northern Pass energy project. The electricity needs for NH have not been well documented; we should be using windpower and solar power to offset our discontinuation of coal fired plants; the project will harm valuable ecosystems in our state; it will negatively affect tourism and property values; and will increase our electric costs.

I oppose Northern Pass completely, and I also oppose above ground utility poles.”

Sincerely,

Laurie Rardin
East Concord, NH
