I wish to express my strong feelings against the Northern Pass project. We have been misled by those who are touting the benefits of this project into believing that it will reduce the cost of electricity to NH ratepayers. In reality, there will be ABSOLUTELY NO benefit to the ratepayers as this project is only for the benefit of a Canadian Business in transporting electricity through our beautiful state down to the southern part of New England.

The towers keep growing in height each time we turn around, and they are going to be an eyesore to the entire state.

Please don't allow Northern Pass to cut through our beautiful state and mar our natural wetlands and negatively impact our environment. New Hampshire's landscape needs protecting NOW.

Respectfully

Marie Ayles
