Dear committee members,  
As someone who grew up in New Hampshire and deeply loves our state and in particular our landscape, I am writing to request that you oppose the Northern Pass Project.  
As a state that relies on tourism as a large part of our income, it seems a fool hardy plan to scar our landscape with these massive towers. And this would be forever!!!  
It will also destroy wetlands and have other negative environmental impacts.  
It is not clear that NH will actually benefit from this financially. And most electricity from the Northern Pass will go to southern New England, not New Hampshire!  
Please join with me in opposing this plan.  
Protect our beautiful landscape.  
Thank you.  
With hope in your good judgement,  
Pat Wilczynski
