To whom it may concern:

I am writing you to express my strong opposition to The Northern Pass Project. I think that's its impact on the great state of New Hampshire will be very negative. First and foremost from an environmental standpoint the impact of scarring up 192 miles of this beautiful place will be catastrophic to the forest, its flora & fauna. In addition to the very negative impacts the fragile environment, the visual eyesore of very tall ugly towers to carry the transmission lines will be a gash in this pristine beauty and impact the economics of the state negatively by ruining property values all over the state. It will destroy our White Mountain National Forest areas and the negative impact of the Northern Pass project keeps both New Hampshire tourists and out of towners from visiting our beautiful state and helping to support the towns of the state whose income depends on the tourists visiting our forests, our ski areas, and snowmobiling our beautiful woods. New Hampshire is a wondrous, wild, and beautiful forested state and it is our heart and soul and our economic lifeblood! But if you (the proponents of The Northern Pass Project) destroy it with the Northern Pass Project, shame, shame on you. It will be on your conscience that you destroyed the special place that is The Great State of New Hampshire - this place the Granite State - the place I love and call my Home! I am vehemently opposed to The Northern Pass Project! Please do not approve of this project, do not destroy New Hampshire forever - because once it is defiled it cannot be returned to its beautiful condition!

Sincerely Yours,
Steven J. Richardson
