We have NEVER thought Northern Pass was a good idea. We love Pittsburg and the area north of the notches and are completely opposed to Northern Pass going through this area (or any part of New Hampshire) in any form.

Any jobs created would almost certainly be only temporary. The power produced is almost certainly not going to benefit us. And the scars and ugliness would detract permanently from New Hampshire's natural beauty and will diminish our tourism industry which is so important to our state. Nw Hampshire's beautiful landscape would very literally never be the same.

Hearing how much our own town would be impacted by the proposed construction has made us even more opposed to Northern Pass than we were before.

Please protect New Hampshire from this misguided project and stop Northern Pass.
